

Italian Ice Sales Strategy Meeting Report

Summary of discussion, priorities and next steps.

Purpose

The meeting focused on creating a structured and scalable sales system. The objective is to move from an informal approach to a repeatable process that can be followed consistently by the whole team.

Sales SOP

Create a Standard Operating Procedure covering: lead generation, customer qualification, understanding customer needs, samples, demonstrations, follow-up, sales conversion, technical support and reporting.

Customer Segmentation

Different customer groups require different approaches: hotels and hotel chains, restaurants, distributors, and equipment manufacturers/fabricators. Each segment requires its own sales pathway.

Demonstration Strategy

Move from sample-only sales to a stronger model: Sample → Demonstration → Feedback → Conversion. Regional visits should target approximately 5–6 customer meetings per trip.

Sales Tools

Develop professional support materials: website, catalogue, product sheets, brochures, tutorial videos and QR codes linking customers to technical information.

Customer Feedback & R&D;

Create a regular connection between sales and R&D.; Customer requests, market trends and product gaps should be reviewed regularly. Example: vegan, sugar-free and high-protein product opportunities.

Gelato School & Consultancy

Develop training and consultancy services alongside product sales, including business setup support, product development and professional courses.

Targets & Incentives

Create realistic sales targets and an incentive system linked to performance, customer acquisition and business growth.

Financial Control

All activities involving costs should follow: Proposal → Budget Approval → Activity → Results Review.

Immediate Actions

Jesse: prepare SOP structure, incentive proposals and regional sales review. Sales team: share customer data, sample tracking and priority opportunities. Goa team: begin planning product tutorial videos.

Next Meeting

Friday at 10:00 AM. Focus: review progress, discuss SOP structure and confirm priorities.
